**Gilbert, Stahl Announce Sewage and Water Study Grant**  
*Mayfield Township to Benefit from \$20,000 in State Funds*

(LANSING) – Businesses located near M-24 in Mayfield Township will soon benefit from funds allocated by the Michigan Economic Development Corporation, state Senator Jud Gilbert, R-Algonac, and state Representative John Stahl, R-North Branch, announced today.

“I am pleased the Michigan Economic Development Corporation recognized the need for this funding,” Gilbert said. “This is another example that positive things happen when state and local government works together.”

Mayfield Township recently requested a Community Block Development Grant in the amount of \$20,000. The funds will be used to do a feasibility study on water and sewer expansion from the city of Lapeer to Mayfield Township to service Durakon Industries and other companies located along M-24.

“These funds are welcome in anticipation of infrastructure expansion necessary to accommodate the needs of local businesses,” Stahl said.

Gilbert and Stahl also announced the local public sector has allocated \$4,000 for the project.
